🐙 MSaini-Dev

Professional Summary

Passionate and dedicated entry-level MERN Stack Developer with strong foundational knowledge in MongoDB, Express.js, React.js, and Node.js. Eager to contribute to innovative web development projects while continuously learning and growing in a collaborative environment. Proficient in version control with Git and GitHub, with a solid understanding of modern web development practices and responsive design principles.

Education

Bachelor of Computer Science

2022 – 2025

Sri Balaji Collage of Engineering & Technology,, Jaipur, Rajasthan

- GPA: 6.9/10
- **Coursework:** Data Structures and Algorithms — Object-Oriented Programming — Web Technologies

Projects

BookFair: Resell School Book

github.com/MSaini-Dev/BookFair [🔗](#)

- Developed a full-stack book trading platform with user auth, real-time messaging, and geolocation features
- Implemented a responsive UI with dark/light mode, advanced search filters, and book management system
- Integrated Supabase for authentication, real-time database, and storage with optimized queries
- Designed interactive dashboards for users to track listings, favorites, and messages
- Tools Used: React, Supabase (Auth/Realtime DB/Storage), Tailwind CSS, React Router

ClipCrate: Chrome Extension

github.com/MSaini-Dev/ClipCrate [🔗](#)

- Built a Chrome extension for color palette and clipboard management with drag-and-drop reordering and cloud sync.
- Added real-time color picking (EyeDropper) and instant HEX/RGB copy-paste via clipboard APIs.
- Designed dynamic UI with context menus, collapsible slots, and user feedback systems.
- Tools Used: React, Firebase, Chrome APIs (Storage/EyeDropper), React-Beautiful-DND

ChatAI: Real-Time AI Chat Platfrom

github.com/MSaini-Dev/ChatAI [🔗](#)

- Developed real-time chat platform with AI-powered responses using React, Node.js, Socket.io, and Hugging Face API integration
- Built secure backend with JWT authentication, MongoDB Atlas database, and RESTful APIs for user management and data persistence
- Implemented responsive UI with TypeScript, Tailwind CSS, typing indicators, and live user status updates
- Tools Used: React, Node.js, Socket.io, MongoDB Atlas, Hugging Face API, TypeScript, Tailwind CSS

Technologies

Languages : Javascript, Typescript, Python

Frontend : HTML5, CSS3, Tailwind CSS, React JS, FarmerMotion, Shadcn, React Hook Form, JavaScript

Backend : Node.js, Express.js, RESTful APIs , MongoDB

Tools & Technologies : Git & GitHub (Version Control), VS Code, Postman

Soft Skills : Debugging Skills, Communication, Problem Solving, Teamwork Skills
